To Whom It May Concern:

John Wayne Construction has just completed a renovation project at the 94-room Holiday Inn Express in Macon, Georgia and I would like to personally thank John Wayne Construction, in particular Wayne Griner, for the excellent work they provided on this project.

The work involved removal of existing wall coverings, all prep work associated with installation of Acrylic wall coating, re-painting all guest room and bathroom ceilings, painting all guestroom door jams, skim coat existing textured walls, and applying kilz stain killer on walls.

This entire project was completed in an occupied hotel that included 6-story building, and John Wayne Construction ensured that none of the buildings guest or employees was inconvenienced in any way. All of the workers were professional and exceptionally courteous. I look forward to working with John Wayne Construction in the future. Furthermore, I would recommend his company to anyone seeking competent, professional and detailed oriented contactor.

Sincerely,

Ellen Buchhammer, Purchasing
