

UNIVERSITY INN  
351 West Dr.  
Maxwell AFB, AL 36112

10 January 2003

To Whom It May Concern:

John Wayne Construction has completed four buildings and three suites with the very popular and resilient DuroPlex process at the University Inn. Two of these buildings and all of the suites were cinder block walls. The process is relatively clean and is certainly attractive.

Mr. Griner's team of install personnel were very customer focused. They worked around numerous scheduling issues and still had every project done on time or ahead of time.

I would recommend the process to anyone interested and feel very fortunate to have had the crew from John Wayne Construction performing the install. Please contact me at DSN 493-4780 or commercial 334-953-4780 for a reference.

Rhonda Goins, CIA  
Lodging General Manager
