

# ONYX DESIGN GROUP

May 10, 2000

Onyx Design Group has just completed a renovation / remodeling project at the Park Place Office complex in Boca Raton, Florida and I would like to personally thank John Wayne Construction for the excellent work they provided at this project.

JWC scope of work included re-painting ceilings, doors and trim in a high traffic lobby area, removing existing wall coverings and installing Duroplex seamless Acrylic wall coatings throughout the first floor corridors with an authentic Old World look that was second to none.

This entire project was completed in as occupied six-story building and JWC ensured that none of the buildings tenants or guests were inconvenienced in any way. All of JWC workers were professional and exceptionally courteous, always willing to stop and explain every aspect of their installation. I look forward to working with JWC on many more projects in the future.

Sincerely,

Maria Flores
